Elshadai Tegegn

Software Engineer

EDUCATION

BSC in Software Engineering

Addis Ababa University | \underline{AAiT} | Sept 2018 - July 2023 Major GPA - 3.67/4.0

Global UGRAD scholarship program

<u>Tennessee Tech University</u> | <u>Transcript</u> | January 2022 - May 2022 Achieved top 2% Scholarship; Dean's List: ML, Algorithms, Criminology, American Government

PROFESSIONAL DEVELOPMENT, LEADERSHIP and CERTIFICATIONS

AWS ML/AI NanoDegree Scholarship Program

<u>Udacity</u> | <u>Certificate</u> | July 2023 - November 2023

Spectrum management

<u>United Nations | Certificate</u>

August 2023

Cornell, Maryland, Max Planck Pre-doctoral School'22

CMMRS | Certificate | 1st, August 2022 - 7th August 2022

Competitive Programming

A2SV | Aug 2021 - Present

Engaged with talented African students to tackle urgent local problems through digital solutions, achieving a 70% success rate at Google internship interviews in 2022.

Consultation and Leadership

Share Program | Certificate | March 2020 - Jan 2022

Served as President of ShARE AAU/AAiT 2022 Program, consulting on strategic initiatives for <u>Axiom Financials</u> and conducting mobility research post-COVID-19 for <u>Valeo</u>.

PUBLICATIONS

Bonnet, C., Luo, D., Byrne, D.,... Tegegn, E., et al. "Jumanji: a Diverse Suite of Scalable Reinforcement Learning Environments in JAX." ArXiv, ICLR 2024.

TECH STACK

Languages: Dart (Flutter), C++, JavaScript (NodeJS, ReactJS, ExpressJS), C# (.NetCore), Python (Django, Flask, Matplotlib, Seaborn, Pandas), Java, Kotlin ML & DL: TensorFlow, Jax, Pytorch (Neural Networks, NLP, Deep Learning, CNN)

Front-end: HTML, CSS, Bootstrap

Database Management: Oracle, PostgreSQL, MySQL, MongoDB

Other: AWS Cloud, Docker

New York City, New York, tel: +19735835012

Email | LinkedIn | Github | Website

LANGUAGES

Amharic - Native English - Fluent French - Beginner German - Beginner

AWARDS

Huawei ICT Innovation 2021, 2nd place from Ethiopia: <u>Link</u>

Hult Prize Regional, 2nd place winner

Ethiopian Collegiate Programming Competition, top 15% from East Africa and Arab: Link

EXTRA-CURRICULAR ACTIVITIES

Gebeya Inc - Vetting Expert

Huawei - Campus Ambassador

ITSC Inspire, GDG Addis, Women TechMakers Addis -Event Organizer

Project Chalk-the-talk - Project Coordinator

BigDream Ethiopia - Content Creator

Girls Can Code - Volunteer Coding Instructor

EXPERIENCE

Software Engineer

Organization of Southern Corporation | Remote | October 2023 - Present

- Enhanced digital access to education and research by working on the Greater South Information System (GreSIS).
- Engineered user access controls for GreSIS, bolstering security and user experience.
- Implemented social networking features for academic collaboration on the platform.

Machine Learning Research Intern

- Instadeep Ltd | Remote | January 2023 July 2023
 Engineered the implementation of a Rainbow DQN algorithm in Mava, optimizing model training efficiency by 30% and enhancing multi-agent environment capabilities.
 - Crafted robust reinforcement learning environments in <u>Iumanii</u>, including a Graph Coloring environment and a Sliding Tiles Puzzle environment, which resulted in a 20% improvement in simulation fidelity and reliability across multiple testing scenarios.

Senior Backend Engineer

Gebeya Inc. | Ethiopia | March 2023 - July 2023 (Concurrent with ML Research Intern Role)

- Spearheaded the architecture and development of critical backend functionalities, comprising 48% of the system, for Mesirat, a platform designed to connect 1,000 gig market service providers with top talent.
- Assembled a user authentication system by collaborating with diverse teams, bolstering platform security, and reducing unauthorized access by 85%.
- Streamlined data access by implementing an optimized caching solution, cutting data retrieval times by 40%.

Software Engineering Intern

Amazon | Germany | October 2022 - December 2022

- Worked on an end-to-end service to annotate images and browse image labels
- Implemented a frontend SPA using AWS' internal UI framework and a backend using AWS Lambda.
- Created the AWS CDK typescript code to deploy both the front-end and backend and provision additional AWS resources like connections to OpenSearch

Software Development Engineering Intern

Audible Inc., US | June 2022 - August 2022

- Spearheaded the development of payment-related features, prioritizing secure transaction environments and compliance
- Amplified user sign-ups by 16K annually through strategic full-stack feature development, blending user-friendly design with functional excellence.

Summer Geometry Initiative - Mentor/Research Intern

MIT | Certificate | US | July 2022, August 2022 and July 2023, August 2023

Merged roles of mentor and researcher, contributing to projects in computational geometry and enhancing methodologies in computer graphics.

- How to Mend a Broken Part: Led as a mentor to innovate in geometric fracture assembly and formulate an evaluation metric, inspiring an open-source assembly challenge.
- Plane and Edge Detection (RANSAC): Contributed to meticulous 3D point cloud plane detection, leveraging the RANSAC algorithm for structured and precise data processing.
- Revisiting Computational Caustics: Worked with SGI Fellows, exploring differential rendering and optimal transport solutions, streamlining reflection calculations via vectorization, and addressing mesh reconstruction amidst noise.
- Out-of-Context Data Augmentation for 3D Scenes

Back-end Engineer

Eskalate | US | August 2021 - May 2022

- Conducively contributed to 31% of the backend development of HakimHub, playing a crucial role in the platform's developmental milestones.
- Proactively led the backend team for a week during an interim absence of the team lead, ensuring continuity and minimizing disruptions in operations.

Automation Tester and Digitization Engineer

QualityTaskForce | Poland | August 2021 - March 2022

- Executed automation testing using Selenium and Python for the Plume Mobile application, ensuring robust and reliable application performance.
- Championed the digitization of company processes, augmenting process flow speed by 21% through strategic technological interventions.

COO, Co-founder, Full-stack Engineer

Knovuslab | Ethiopia | March 2020 - PRESENT

- Pioneered the development of Motorride, a ride-hailing platform mobile app, overseeing all phases from concept to deployment and contributing to mobility solutions.
- Significantly contributed to Shega, Ethiopia's prominent tech news platform, ensuring the region's consistent, reliable source of tech news.
- Orchestrated the system architecture, development, and leadership of the backend team for NileStream, an indigenous audio streaming platform, navigating through the challenges of the tech start-up ecosystem.
